- Anti Loitering
  - Door Ajar Notification
  - Latchkey Child Notification

## Safe package delivery plus... better building security for about \$1 a day

### NO DOORMAN? NO PROBLEM!

With Video Doorman®, tenants in non-doorman buildings can receive Fedex, UPS and Overnight Mail packages, as well as deliveries from local retailers. Video Doorman® functions just like an actual doorman, but for a small percentage of the cost. Video Doorman® uses state-of-the-art surveillance equipment and procedures to provide optimal security. Access control, monitoring, recording and secure package storage are all integrated into one system.

### HOW IT WORKS

When a courier presses the button on our Video Intercom Panel installed on the outside entry of your building, a trained Central Station Operator views the courier, obtains tenant delivery information, and allows entry via our remote system. All activity is recorded...both audio and video!

A series of cameras within the building, supplied with speakers and microphones, monitors the delivery's progress through the building while "escorting" the courier to a secured package room. The tenant is then notified. And this same system can "escort" tenants to their floor with cameras/speakers in the elevator.

### WHAT YOU GET

- "Doorman Services" for about \$1 a day
- Safe secure package delivery and notification
- 24/7 CCTV surveillance and access control security
- A secure package room
- On-call "escort" service to your floor
- Emergency access for police, fire, and medical help

**1**

### ACCESS

The system starts with an exterior Video Doorman® entrance panel equipped with a backlit high-resolution camera, a built-in speaker/microphone with noise reduction, and a VDM Proximity card reader.

**2**

### CENTRAL STATION

The signal travels over a high speed internet connection to a 24-hour UL certified, Central Station. Operators are trained to handle video monitoring calls and all systems are backed-up.

**3**

### ENTRY/TRACKING

High Resolution cameras and speaker/microphones allow Central Station operators to interact and monitor the courier to the package room and out of the building. The tenant is then notified of the delivery.

**4**

### SECURE ALARMED PACKAGE ROOM

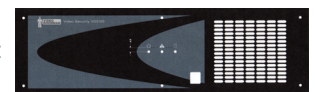

We install a magnetic lock, door closer, and contact, and a camera with speaker/microphone and card reader in your package room. All connected to our Central Station for remote release/monitoring.

**5**

### 24/7 RECORDING

Video Doorman® uses the most advanced, professional digital recording system. It provides 24/7 real time, high-resolution video recording, and on-call 2-way remote audio/video access control. 24/7 Vital Signs Monitoring instantly reports any system malfunction.

# Video Doorman® Services

## 1. DELIVERY SERVICE

We will remotely (from our UL certified Central Station), view and talk to delivery personnel. We will let them into the building, track them via a camera and speaker/microphone, open the package room door and escort them out. We then will notify the tenant a package is awaiting them.

## 2. VIDEO ESCORT

By pressing a remote Video Doorman® transmitter prior to entering the building, a tenant will come up on our screen when they enter the lobby and we can “escort” them to the elevator or to their floor (if there’s a camera/microphone in the elevator). We can talk, listen and view. If there’s an intruder, we’ll warn him we’re watching and recording, and if necessary we will dispatch authorities.

## 3. 24/7 CCTV RECORDING & REMOTE VIEW

## 4. VITAL SIGNS MONITORING

The DVR is programmed to report to Central Station when it needs service, if a camera is out, or if it’s turned off.

## 5. MAINTENANCE

Service, parts and labor, on all products that are part of the Video Doorman® is covered under the quarterly. This includes the DVR, cameras, speaker/microphones, and access control.

## 6. CARD ACCESS MANAGEMENT

Enrollment.

## 7. SECURE PACKAGE ROOM

## 8. DOOR AJAR NOTIFICATION

To owner

## 9. FORCED ENTRY DISPATCH

To police

## 10. LATCHKEY KID NOTIFICATION

When a child comes home, we email the parent.

## 11. BUILDING SERVICES ACCESS

Allows building vendors, such as elevator, plumbing, HVAC, electrical, etc. into building with pass codes.
